

# **Construction Materials Testing Technician**

**HAENGEL & ASSOCIATES ENGINEERING, INC. (HAE)**, in Canton office are seeking Construction Materials Testing Technicians to join our team.

We provide construction inspection and material testing services to a broad range of local and national clients. We are looking for individuals who are interested in joining a dynamic team and building their career in the field of construction inspection and materials testing.

We're looking for a person with strong initiative, who will perform routine to complex inspection and testing of construction materials in the field, in order to verify conformance to construction plans and specifications.

The technician will prepare daily reports and data sheets and may be called upon to perform various tasks at the discretion of the supervisor.

The successful candidate will be encouraged to expand their skills and certifications through company provided training and mentoring. This is a career opportunity to become a member of a highly successful and fast paced team.

Must have own vehicle, a valid driver's license and clean driving record required.

## **Responsibilities for the Field Service Technician**

- Perform routine field construction materials testing and inspection services on road, utilities, parking lots, and building construction projects
- Soils – observes placement of fill material and performs nuclear moisture-density tests. Reviews data for compliance with project requirements, reviews and/or observes soil conditions in embankments, shallow footings and drilled piers.
- Portland Cement Concrete – performs temperature, slump and air content tests and makes compressive strength test cylinders
- Hot Mix Asphalt (HMA) – monitors asphalt paving operations, conducts nuclear density tests and collects samples for laboratory testing
- Special Inspections – performs Special Inspections in accordance with the requirements of the International Building Code (IBC) for one or more types

of construction including Reinforced Concrete, Structural Masonry, Post Tensioned Concrete, and the likes.
